Introduction

As the population of Qatar grows, so does the demand on the country's healthcare systems. As a result, healthcare in Qatar is transforming, with new buildings, equipment, procedures, recruitment and training being developed, all in line with the Qatar National Vision of 2030.

With the population growth, Qatar has seen an increase in the number of road traffic accidents and construction site injuries. To help respond to this, Hamad General Hospital, part of Hamad Medical Corporation, introduced a specialist multi-disciplinary, inpatient and outpatient Wound Care Unit.

Providing such high quality wound care requires that healthcare workers work effectively with their colleagues across other disciplines. This is often referred to as inter-professional collaboration (IPC). There is evidence to support that employing a multidisciplinary team strategy in healthcare can lead to improved outcomes for patients.

This three day conference aims to support the continuing education in evidence based practice to provide comprehensive information about the various aspects of clinical and practical care for patients. The conference will also share the most modern scientific applications in the treatment of wounds resulting from chronic diseases such as diabetes and look at ways to improve the wound care system by offering innovative ideas in prevention, treatment, management and research worldwide.

About Hamad Medical Corporation

Hamad Medical Corporation (HMC) is the main provider of secondary and tertiary healthcare in Qatar and one of the leading hospital providers in the Middle East.

For more than three decades, HMC has been dedicated to delivering the safest, most effective and compassionate care to all its patients.

HMC manages nine hospitals – six specialist hospitals and three community hospitals – as well as the National Ambulance Service and home and residential care services.

In January 2016, HMC achieved the significant distinction of becoming the first healthcare system across the globe to have all its hospitals accredited by Joint Commission International under the Academic Medical Center accreditation program. Additionally, the National Ambulance Service, Home Healthcare Service, Stroke Service and Palliative Care, have all received this prestigious accreditation since 2011.

To meet the needs of a rapidly growing population, HMC has announced ambitious plans to expand capacity across its network through to 2030. This expansion plan includes a further three new hospitals in Hamad Bin Khalifa Medical City.

HMC is leading the development of the region's first academic health system – combining innovative research, top-class education and excellent clinical care – and is committed to building a legacy of healthcare expertise in Qatar. HMC collaborates with key partners who are experts in Qatar and beyond, including Weill Cornell Medical College-Qatar, the Institute for Healthcare Improvement and Partners Healthcare, Boston.

HMC is also the first hospital system in the Middle East to achieve institutional accreditation from the Accreditation Council of Graduate Medical Education – International (ACGME-I), which demonstrates excellence in the way medical graduates are trained through residency, internship and fellowship programs.

Speech of Dr. Yousuf Al-Maslamani (chairperson of scientific committee) in the opening ceremony of the conference

Ladies and gentlemen,

It's my pleasure to present the opening speech for the first conference of its kind organized in the State of Qatar, namely the Qatar First International Wound Management Conference. It's my pleasure as I see this huge congregation of medical personnel in Qatar, noting that there is sincere and continuous willingness to learn and exchange of expertise.

Wound care has become a discipline with its own new techniques, tools, and specialists. Moreover, the number of patients with wounds steadily increases as there are traffic accidents, diabetics, and patients undergoing surgeries.

For several years we have been discussing a plan to hold this conference aimed at underscoring the great importance to follow up with the scientific progress in this field. Today, we succeed in organizing this forum with participation of over 40 scholars from across the world in order to share the latest sciences and the latest scientific experiences.

Also, the conference will be accompanied by an exhibition displaying the latest appliances and equipment by local and international companies.

This success and this proper arrangement is thanks to the distinguished medical staff from HMC. They have been working on the conference for around a year in order to achieve its goals.

Not only does the conference draw attention from within medical circles but it also receives attention from companies importing equipment and wound care services. So many companies participate, support, and sponsor this event, setting a new example of engagement in organizing conferences.

I'm glad to say that HMC is moving forward and investing to develop the wound management department. Therefore, organizing such conferences and the accompanying events will enlighten us for further progress and prosperity.

Finally, I'm pleased to sincerely thank H.H. Dr. Hanan Mohamed Al Kuwari, the Minister of Public Health, who closely followed up plans to hold this conference. Moreover, I'd like to thank our dear speakers and participants who are sharing their knowledge and expertise.

Our thanks go to all those who have contributed to achieving this success, hoping that the first conference will be a good start for more specialist conferences in this field.

Speech of Ms. Shaikha Ali Al-Qahtani (chairperson of organizing committee) in the opening ceremony of the conference

Ladies and gentlemen,

As I take this podium, I feel that one of my big dreams in life has been achieved. I've been working in the medical field for many years and had a dream of organizing a conference on the most modern medical sciences of wound care. I joined HMC almost 10 years ago, being promoted until I became the director of the outpatient clinics and wound care services at Hamad General Hospital. I have earned my first Masters degree in nursing studies from University of Hertfordshire in Britain as well as a second Masters degree from the University of Calgary recently. I persistently aspire that this discipline of medical science should progress in the State of Qatar, with more male and female youths joining nursing units, especially wound care units.

I've witnessed a large number of similar conferences around the world in recent years and we always believed that organizing similar conferences in the State of Qatar would bring about great benefits to healthcare professionals here. Furthermore, the conferences will have a substantial effect in persuading public and private hospitals to invest more in their wound care units. At present, appliances and equipment are being developed every day and new techniques will be revealed during this conference.

This success being accomplished today, firstly by grace from Allah, and secondly it is due to the encouragement and inspiration which we acquired from our wise leadership led by H.H Sheikh Tamim Bin-Hamad Al Thani, the Emir, may Allah protect him, and H. H Father Emir Sheikh Hamad Bin-Khalifa Al Thani, may Allah protect him. This success is also due to encouragement and inspiration from Her Excellency Dr. Hanan Mohamed Al Kuwari, Minister of Public Health.

I'd like to seize this opportunity to express my gratitude and love to both my mother and father Ali Abdallah al-Qahtani who are sitting amongst you today. They have given me indescribable support and encouragement to succeed in my career. Also, I thank everyone that has contributed to make this conference a success, including the scientific committee, the organizing committee, the communication department, the Hawkama Center, and sponsors of all levels. I express special and sincere gratitude to Dr. Yousuf al-Maslamani - my teacher and perfect exemplar - for his continuous support. I further thank Mr. Abd-al-Aziz al-Amadi, CEO of Qatar National Convention Center.

المتحدثون SPEAKERS

استقطب هذا المؤتمر أكثر من ٤٠ متحدثاً من أميز الخبراء في مجال الجروح من داخل وخارج قطر.

This conference attracted over 40 distinguished speakers in the field of wound care from Qatar and abroad. The list of the speakers is as follows:

المتحدثون من اللجنة

SPEAKERS FROM COMMITTEE:

Dr. Hassan Ali Al Thani, MD, MB. Bch. FRCS(C), FRCS (Ire), CABS, FACS

*Head of Trauma and Vascular Surgery
Hamad Medical Corporation*

Dr. Hassan Al-Thani is the Head of Trauma and Vascular Surgery Sections at HMC, also a fellow of the American College of Surgeons. He graduated from the Royal College of Surgeons in Ireland and completed his surgical training in Qatar and Canada. He completed his training in trauma and vascular surgery at McMaster University Health Sciences, Canada. After the completion of his training, he joined Hamad General Hospital as a Senior Consultant in the Department of Surgery in 2004. In the same year, he established the Vascular Surgery Section.

Dr. Al-Thani was involved in a number of administrative duties which include; Board Member of Hamad Medical Corporation from 2006-2008, Chairman of Organ Transplant Committee from 2008-2009, Board Member of Weill Cornell Medical College in Qatar from 2008-2012, Executive Board Member of the Gulf Vascular Society from 2007 and President of the Gulf Vascular Society from 2009.

Ms. Shaikha Ali Al Qahtani, MSc, RN

*Director of Nursing – Wound Care Management (ACS) and Outpatient
Department
Ambulatory Care Service, Hamad Medical Corporation*

Ms. Shaikha Al -Qahtani is the first Qatari Director of Nursing and Wound Care Management at Hamad General Hospital (HGH). She oversees Nursing and Wound Care Management for ambulatory care services in the hospital's OPD and surgery unit, as well as Hamad Medical Corporation's (HMC) Bone and Joint Center and Fahad Bin Jassim Dialysis Center. She is a member of the American College of Wound Care and Tissue Repair (AWCT).

Ms. Al-Qahtani has previously worked as a subspecialty wound care nurse in the Patient and Family Education Unit at HGH, also she was covering Women's Hospital. She has conducted many wound care awareness programs for schools and held numerous wound care workshops for students and faculty at the University of Calgary (UCQ). Ms. Shaikha has also attended and participated in many international courses and conferences.

Ms. Al - Qahtani completed her Diploma in Nursing in 2007 from the High Institute of Nursing – Doha, Qatar, and completed an International InterProfessional Wound Care course from the University of Toronto (IIWCC) in 2009.

Ms. Al Qahtani received her BSN in 2013 from University of Calgary – Qatar and followed that with a Masters in Science of Skin Integrity Skills and Treatment from the University of Hertfordshire , UK (2014). She has recently completed her Master of Nursing – Thesis at University of Calgary – Qatar (2016).

She is the first UCQ student to complete the MN thesis program. Her research is already making an impact – the model of collaborative interprofessional practice in the outpatient wound clinic at HMC was rated very highly by her research respondents. Ms. Shaikha is disseminating her findings about the contributions of a well-developed interprofessional team who support holistic approaches to healing wounds. She has also published number of articles and abstracts and has presented in national and international conferences.

المتحدثون من اللجنة

SPEAKERS FROM COMMITTEE:

Dr. Habib Al Basti

*Head of Plastic Surgery and Burns Unit
Hamad Medical Corporation*

Dr. Habib Al Basti has obtained his Medical Education from Ain Shams University, Cairo Egypt in December 1981 and as a Resident in Training in the department of General Surgery from 1983-1989. Dr. Habib joined the fellowship at the Royal College of Physicians & Surgeons, Glasgow, UK from 1990 to 1994. Upon his return to the Plastic Surgery department of Hamad Medical Corporation he was promoted as a Senior Specialist from 1996-1999 and as a Consultant from 1993 and served up to 2003 for the same post. By 2004 Dr. Habib was as a Senior Consultant.

Apart from hospital duties, Dr. Habib is delighted to share his knowledge in the field of surgery and he was also involved in teaching as an Assistant Professor in Clinical Surgery at Weill Cornell Medical College, Qatar. Several national courses and international conferences in Plastic Surgery have been organized by Dr. Habib as well, including formal training with Hand on Wound Healing Management and ISAPS Qatar.

Dr. Habib is also a member of Examination Board for Plastic Surgery specialty in the Kingdom of Saudi Arabia, Libya and the Arab Board of Plastic Surgery.

Compelled by a passion for patient care, Dr. Habib was duly appointed Chairman of Competency Committee for Plastic Surgery Evaluation Program and the Acting Head of Plastic Surgery and Burns Unit at Hamad Medical Corporation.

Dr. Rashad Alfkey, MD, PhD, FACS

*Consultant, Acute Care Surgery
Hamad Medical Corporation*

Dr. Rashad Fouad Elsayed, MD, PhD, FACS, is an Assistant Professor of Surgery at Alazhar University Egypt. He is also a consultant of Acute Care Surgery at Hamad Medical Corporation in Qatar. Prior to joining his current position at HMC, Dr. Rashad was a lecturer of General and Laparoscopic Surgery at Alazhar School of Medicine, Cairo, Egypt until 2006. Dr. Rashad obtained his MD from Alazhar School of Medicine, Cairo, Egypt in 2004 and joined HMC as a specialist of general and laparoscopic surgery and a consultant of general and laparoscopic surgery. He is a member of the American Collage of Wound Care and Tissue Repair (AWCT) and a member of the European Wound Management Association (EWMA).

Dr. Rashad is an instructor of clinical surgery at Weill Cornell Medical Collage in Qatar since April 2012. He is the supervisor of the wound care clinic at Hamad General Hospital, dealing with all types of wounds including diabetic wound infection. Dr. Rashad has published two books in Arabic, Medical and Memorial Aspects of Fasting and Uses of Laser in Medicine and Surgery in collaboration with Professor Ahmad Alnaghy, Professor of Physics, Faculty of science, Cairo University. He has many articles in national and international journals, has been a speaker in national and international conferences in addition to his participation in more than 40 national and international surgical conferences. He is a member of many hospital committees including the program evaluation committee, perioperative quality group, best care always team, and was awarded The Egyptian Academy of Scientific Research and Technology Award for the simplified scientific writings for youth for four subjects (Laser light, Microbiology, Genetic Engineering and Life in the 21st century).

المحدثون من اللجنة

SPEAKERS FROM COMMITTEE:

Dr. Sami Otman

*Senior Consultant & Head of Burns Unit
Hamad Medical Corporation*

Doctor Sami Otman is a senior consultant and the Head of the Burns Unit in Al Wakra Hospital at Hamad Medical Corporation. Dr. Otman qualified with MBBCh from the Faculty of Medicine of Tripoli University Libya in 1982 and trained in Tripoli before he moved to France in 1991.

He undertook his surgical training in Libya and France, with specialization in burns, plastic and reconstructive surgery; since then he has been awarded with:

- The Diploma in Skin and Applied Burn Treatment, Faculty of Medicine of Toulouse, France.
- The Diploma Interuniversitaire of Specialisation in Stomatology, Montpellier, France.
- The Diploma of the French College of Plastic, Reconstructive and Aesthetic Surgery
- Award a Ministerial State Qualification in Plastic, Reconstructive and Aesthetic Surgery.

He was in the post of PraticienHospitalier, " a lifelong post which is equal to Senior Consultant or Associated Professor according to the English system" in burns and reconstructive surgery centre at the Lapeyronie University Hospital of Montpellier, France. He has a special interest for Burns and the Reconstructive Surgery and the innovative techniques and was one of the first surgeons in France who used; The NPT, the artificial dermis "Integra & Matriderm" and the Versajet. Most of his publications and attended congresses are in the field of burns and chronic wounds.

Dr. Otman has undertaken research in burns and has several publications together with many presentations at national and international societies. He has been involved in humanitarian burn treatments in Togo, Afghanistan, and Cambodia. He is a member of several healing and burns societies. He also has an extensive teaching experience.

Dr. Emmanuel Ngwakongnwi

Assistant Professor, University of Calgary – Qatar

Dr. Emmanuel Ngwakongnwi is an Assistant Professor of Health Services Research at the University of Calgary in Qatar. He obtained his PhD in Health Services Research from the Department of Community Health Sciences at the University of Calgary, Canada, in 2011.

His research interest is in health systems and services, sampling methodology, patient reported outcome measurement, chronic diseases, and health policy analysis. He received research funding from the Canadian Institute of Health Research (CIHR), including a CIHR Banting and Best Doctoral Research Award, two CIHR operating grants; and from Qatar National Research Fund (QNRF). Some of his scholarly activity involves teaching and mentoring students in the School of Nursing program. He has numerous peer reviewed publications and is well referenced.

Dr. Khalid Mukhtar, MD

*Orthopedics Surgeon
Hamad Medical Corporation*

With an interest and previous experience in research, academic and conferences, Dr. Mukhtar is one of the graduates of the HMC Medical educational program, and has just finished his Orthopedics Residency at Hamad General Hospital, with a record of 3 Stars of Excellence awards, in successive departmental projects. As an elected representative for the department of Orthopedics surgery in the Organizing Committee, Dr. Mukhtar will be assigned for Musculo-skeletal topics, as well as other tasks.

المتحدثون من اللجنة GCC & INTERNATIONAL SPEAKERS:

Dr. Calypse Agborsangaya, PhD

Epidemiologist

Analytics and Performance Reporting Branch

Health Systems Accountability and Performance Division

Alberta Health, Edmonton AB T5J 2N3 CANADA

Calypse Agborsangaya received a BSc (Hons) degree in Microbiology in 2002, a Master in Public Health Nutrition from Karolinska Institute in Sweden in 2005, and completed his PhD in epidemiology from University of Tampere in Finland in 2010. Dr Agborsangaya has many accolades that include being voted the European Union Young Public Health Researcher of the year (2009) and the Medallion for Research Excellence from the Finnish National Institute of Health and Welfare. He has received several competitive scholastic and travel grants, including a Research fellowship at the Harvard School of Public Health for research on vitamin D and the etiology of multiple sclerosis.

Dr Agborsangaya has over 20 peer-reviewed publications and has presented at several national and international conferences. He currently works for the Government of Alberta, Canada, as an Epidemiologist.

Mr. Keith F Cutting MN, RMN, RGN, Dip N (Lond), Cert Ed (FE)

Clinical Research Consultant, Hertfordshire, UK

Wales, Cardiff, UK, holds a Diploma in Nursing from London University and has a Certificate in Education (FE) from University of Wales, Cardiff. He is a Registered General Nurse and a Registered Mental Health Nurse Keith has been involved in tissue viability for over 29 years. Apart from lecturing he has maintained clinical and research roles and has presented his work nationally and international at conferences that include the World Union of Wound Healing Societies, European Wound Management Association, the European Tissue Repair Society and the Symposium on Advances in Wound Care. He has over 130 peer reviewed publications in journals, book chapters and conference abstracts and has edited Trends in Wound Care volumes IV and V. He has a particular interest in diagnosis and management of wound infection and his paper Criteria for wound Infection¹ remains the most widely cited collation of clinical criteria for wound infection. These criteria have been tested in two research studies and have been adapted for clinical application in many countries around the world.

Keith is a co-editor of The Microbiology of Wounds² the first book dedicated to this topic that explores the role of biofilms in wounds and infection.

Keith is a reviewer for a number of journals, and works with a range of international corporations and medical agencies as an independent consultant.

المتحدثون من اللجنة GCC & INTERNATIONAL SPEAKERS:

Dr. Salma Ebrahim Khuraibet

DF & Wound Care Specialist
DF surgeon
GDFWG – Kuwait
MSc. Wound & Skin integrity-UK

She is a Diabetic Foot Surgeon & Wound Care Specialist since 2002 and finished her MSc. Wound & Skin integrity in the UK. She is a member of EWMA since 2006 and is also a member of the Association of Diabetic Foot Surgeons (A-DFS)-2016. She has participated with the faculty of medicine in Kuwait in student education in diabetic foot. She was also the Past Vice President of "Kuwait Wound Care Society" (2010-2015). She also participated as a speaker and organizer in the "First International Diabetic Conference" in Kuwait at Dasman center in April, 2008. She was also an organizer and speaker in many workshops in diabetic foot in Kuwait and international speaker too. She has several international publications in diabetic foot and wounds in her name. She was the GDFWG course director November 2015 and also the Chairman of the Gulf Diabetic Foot Working Group conference held in Kuwait (4-5 March 2016). She is also an Expert Reviewer in "Wounds Middle East Expert Consensus on NPWT in Infected Wounds."

Dr. Amit Kumar Jain

Associate Professor
Department Of Surgery
Rajarajeswari Medical College
Bangalore, India

Senior Consultant
Division of Diabetic Foot and Wound Care
Brindavvan Areion Hospital
Bangalore, India

Dr. Amit Jain is an Associate Professor in Department of Surgery at Rajarajeswari Medical College, Bangalore, India. Having done is MBBS followed by post graduation in General Surgery, he subsequently super subspecialized in Diabetic foot surgery. He is best described as "An amalgamation of good surgical skills, qualification and expertise" He is also a senior Diabetic foot Surgeon and Wound care expert in Division of diabetic foot and wound care at Brindavvan Areion Hospital, Bangalore, India. Having laid down the world's first Principle and Practice of diabetic foot that will improvise and standardize the practice of diabetic foot around the world, Dr Amit Jain also runs the "AMIT JAIN'S PROJECT FOR DIABETIC FOOT CARE- A NATIONAL AND INTERNATIONAL INITIATIVE", a novel project aimed at empowering and educating doctors and nurses on Amit Jain's principle and practice in the field of diabetic foot. It is believed to be the largest independent project in the field of the diabetic foot.

Dr Amit Jain is an emerging popular international speaker and one of the global pioneers in field of diabetic foot. Well known for his independent new concepts in diabetic foot complications that is revolutionizing the diabetic foot practice around the world, Dr Amit is also a well-known young dynamic speaker and is one among the few top rated qualified diabetic foot specialist from India.

Ms. Layla Hussain Agha's

Specialist Dietitian
Instructor & Certified International Trainer
Kuwait

Layla Agha is a Kuwaiti professional Dietitian. Specialized in Diabetes, Eating Behavior Modification, sport, and internal – parenteral nutrition. Honored By His Highness the Amir (Jaber Al-Subah) Diploma of Science (Food since and Nutrition) for Excellency achievement in 2000. Has been a member of several voluntary team work (Celiac, disability, health and sport women empower). Author of "Nutrition balance of diabetes" in April 2014. She started Dietetics and Health Lecturer since 2007. Prepared and presented two Nutrition and health Radio programs. Elected as a member of Safety and dangerous Committee (Nov. 2015) and member of the Gulf Group of diabetic foot (March 2016). Hold MSc. (Scotland -2009) And BSc.'s (USA- 2005) in Dietetics and Health. Started as Trainer of dietitians and assistances in Kuwait-2006, and in Sultanate of Oman since 2014. Presented nutrition health programs at Kuwait radio station and TV. Will finish her next book about eating behavior modification and new research at the end of 2016

المتحدثون من اللجنة GCC & INTERNATIONAL SPEAKERS:

Ms. Aisha Saif Amour Al Mahrazi

*RN, IIWCC ,Msc
Diabetic foot and wound specialist
Oman*

She is a diabetic foot and wound care specialist with extended training and 13 years experience in wound and diabetic foot. She finished nursing school in 1997 and the international inter professional wound care course (IIWCC) at the University of Toronto in 2009 and MSC Skin integrity skills and management from Hertfordshire University in 2014.

Since 2003 she is working as an in-charge nurse of the first diabetic foot clinic in Oman in Bousher Poly Clinic. Since 2007 she has been involved in national training of diabetic foot and wound management programs.

She is a member in the Oman diabetic foot committee, a member in the national diabetic foot ulcer and management guild and co chair of the Gulf Diabetic Foot Working Group – GDFWG. Currently she is a Sultanate of Oman representative in International Working Group on Diabetic Foot - IWGDF.

She has participated as a speaker and organizer in many national and international conferences and courses.

In 2010 and 2016 she was awarded a GCC nursing award for excellent care and achievements of diabetic foot service and for her input in training primary, diabetic foot and elderly care and community nurses.

المتحدثين المحليين LOCAL SPEAKERS:

Dr. Muna Al Maslamani, MBBS, CABMS, MSc-HCM-RCSI.

*Assistant Head of Infectious Disease-HMC.
Senior Consultant -Transplant Infectious Disease.
Vice Chairperson Quality & Patient Safety - Medicine Department.
Program Director Fellowship Infectious Disease.
Associate Program Director of Transitional Year.
Assistant Professor of Clinical Medicine-WQM-Qatar.
Hamad Medical Corporation*

Dr. Muna Al Maslamani is the Assistant Head of Infectious Diseases Division–Medicine Department at Hamad General Hospital, Hamad Medical Corporation, Qatar. She is a Senior Consultant in Transplant Infectious Diseases for the Division. Dr. Muna added an Msc–HealthCare Management(RCSI-Bahrain) and IHI Fellowship(Institute of Healthcare Improvement &Hamad Medical Corporation) in 2015 to her list of educational achievements which includes MBBS (KFU-KSA, 1997), Certification Arab Board Medical Specialization–Internal Medicine (CABMS–Internal Medicine - Syria, 2002), Certification of Complete HMC–Infectious Disease Fellowship Training Program (HMC-IDFTP- Qatar, 2006). Apart from clinical responsibilities, she also holds various administrative and academic positions in and outside HMC, namely Vice Chairperson for Quality and Patient Safety–Medicine, Fellowship Program Director for Infectious Diseases, Associate Program Director for Transitional Year and also as Assistant Professor of Clinical Medicine in WCM-Q. In 2010, Dr. Muna was appointed Chairperson of Medical Research Committee and Vice–Chairperson of Medical Research Center. Dr. Muna was elected as Assistant Chairperson–Department of Internal Medicine from October 2006 till September 2012, then Acting Chairperson Department of Internal Medicine till December 2012. She is part of various hospital committees and a member of Infectious Diseases Society of America, Transplant Infectious Diseases Society and Immunocompromised Host Society. Dr. Muna is a great role model who is committed to improving the quality of patient care and takes necessary steps to motivate others in doing the same. Her role as a sponsor for the Clinical Care Improvement Training Program (CCITP) of Quality Division has produced 27 Quality Improvement Projects till date. She received various Intramural and External research grants and was able to partner with international researchers in conducting clinical research and published 38 publications till date. In the past five years, she received 3 major grants from QNRF's NPRP cycle totaling \$2,308,120. Several Leadership and Service awards which she received for her achievements are an evidence of her passion and commitment towards work and patients. She is a regular speaker and moderator at many Infectious Diseases Conferences.

المحدثين المحليين LOCAL SPEAKERS:

Dr. Arshad Hussain Chanda

*Consultant, SICU

He has been working as a specialist in vascular surgery from 2008 until now. He has published articles in peripheral arterial disease and hemodialysis patients and their outcomes.

Dr. Suhail Yaqoob Hakim

*Specialist, Trauma Surgery
Hamad General Hospital*

Born 1969 in Srinagar Kashmir, India, he received his pre-med schooling in Kashmir. His parents were the influence and guiding forces during his childhood. He completed his Medical School and Surgical Residency from the Government Medical College Srinagar, Kashmir. The political turmoil in his homeland and a tragic accident in the family was the igniting factor for developing an interest in trauma management. He successfully completed the Post-Doctoral Fellowship in Trauma Care by National Board of Exams, at LTMMC Medical College and Hospital, Sion, Mumbai, India.

He is a team player by nature and is keenly interested in trauma related research and has many publications in trauma. He is proud to be a part of the National Level 1 Trauma Center in Doha, Qatar since 2012 under the Patronage of Dr. Hasan Al-Thani.
