Anticoagulation Clinic

We Collaborate for Better Care

- The Anticoagulation Clinic is a part of the ambulatory internal medicine outpatient clinics and dedicated to helping you manage your blood condition.
- The anticoagulation service is run by a multidisciplinary team of clinical pharmacists, internal medicine consultants, clinical associates, clinical fellows, nurses and educators.
- The Anticoagulation Clinic is specialized in monitoring and managing your anticoagulant medication (other medications need to be discussed with your usual physician).
- In case of bleeding, a swollen and painful leg, or shortness of breath with a chest pain, please go immediately to the Emergency Department.
